# VISIT REPORT

**Location:** ZILHA PARISHAD SCHOOL, HARANTALE

**Date of Visit:** 23<sup>RD</sup> DECEMBER 2019

**Purpose of Visit:** Distribution of stationary and shoes to school children on occasion of Honorable Chairman's birthday.

The Department of Civil Engineering of Dr. D. Y. Patil School of Engineering organized visit to ZILHA PARISHAD SCHOOL, HARANTALE on occasion of Chairman Ajeenkya D Y Patil Birthday on 23<sup>RD</sup> DECEMBER 2019.

Visit was organized with the prior permission and guidance of honorable Director of DYPSOE, Lohegaon. Principal and initiative of our HOD Prof.S.Karodpati and other staff of our civil Dept.

On the 23<sup>rd</sup> December 2019 Staff and students from Dr. Dy. Patil College of Engg. Lohegaon had the pleasure of visiting this Harantale village school.

The Government funding for the school is not adequate and it is through the donations from charity that further progress is made. We had distributed 29 shoes and writing material (like 2 lines, 4 lines, block note book, Pencils, Eraser, Sharpener etc.) along with 20 slates for all Primary and Anganwadi Students.

Mrs. Trupti Todkar was our host and introduced us to her staff and to the enthusiastic children. As we arrived at lunch time we saw the children eating their lunch on the porch right in front of their classrooms.

When we reached students showed a wonderful presentation of life cycle called "PATH NATYA". The energy among them was the next level. Then they come up with some poems, stories and much more.

Then we had an interactive session with them. We asked each one of them what they want to be?? Children were having different answers some wanted to become a Farmer, Doctor, Teacher, Solider, Police, Scientist, and many more ....

Then when we asked that why they want to choose this particular profession the answer that every child gave surprised us. They said "we want to help our parents in their work and want to serve the nation" Some students with an emotional said that they can't see their parents working so hard hence they want to make a robot just to help their parents in work.

We wished Good luck to all them for their ambitions.  
Every student was very happy after receiving all these.

Later we played different games with them. Children also performed dances .It was a great pleasure to get associated in this endeavor.
