Certificate of Sponsorship

Dear Sir,

This is to certify that below mentioned final year Mechanical Engineering students from your institute have been offered a sponsorship for their final year engineering project named "Development of Low Cost & Indigenous Water Ionizer Machine to provide water with different PH values". Students were involved in the project during period from September 2021 to May 2022. During this tenure student were exposed to the advance technology, project execution, product designing and supply chain. We hope the overall experience gained by the students could benefit them and both the organizations.

List of Students:

1. Akash Shinde
2. Simran Joslal
3. Shubham Badgular
4. Prathamesh Mahale

We wish them all the best for their future endeavour.

A Report on Internship

Internship provides an excellent opportunity to learner to see how the conceptual aspects learned in classes are integrated into the practical world. Industry/on project experience provides much more professional experience as value addition to classroom teaching.

Internships are educational and career development opportunities, providing practical experience in a field or discipline. Internships are far more important as the employers are looking for employees who are properly skilled and having awareness about industry environment, practices and culture. Internship is structured, short-term, supervised training often focused around particular tasks or projects with defined time scales.

Core objective is to expose technical students to the industrial environment, which cannot be simulated/experienced in the classroom and hence creating competent professionals in the industry and to understand the social, economic and administrative considerations that influence the working environment of industrial organizations. Engineering internships are intended to provide students with an opportunity to apply conceptual knowledge from academics to the realities of the field work/training.

Students must maintain Internship Diary/ Internship Workbook. The main purpose of maintaining diary/workbook is to cultivate the habit of documenting. The students should record in the daily training diary the day-to-day account of the observations, impressions, information gathered and suggestions given, if any. The training diary/workbook should be signed every day by the supervisor.

The main objective of Internship is to

- To encourage and provide opportunities for students to get professional/personal experience through internships.
- To learn and understand real life/industrial situations.

- To get familiar with various tools and technologies used in industries and their applications.
- To nurture professional and societal ethics.
- To create awareness of social, economic and administrative considerations in the working environment of industry organizations.

The outcomes of Internship is mention below.

- To demonstrate professional competence through industry internship.
- To apply knowledge gained through internships to complete academic activities in a professional manner.
- To choose appropriate technology and tools to solve given problem.
- To demonstrate abilities of a responsible professional and use ethical practices in day to day life.
- Creating network and social circle, and developing relationships with industry people.
- To analyze various career opportunities and decide carrier goals.

The standard procedure for Internship

Students must register at Internshala. Students must get Internship proposals sanctioned from college authority well in advance. Internship work identification process should be initiated in the Vth semester in coordination with training and placement cell/ industry institute cell/ internship cell. This will help students to start their internship work on time. Also, it will allow students to work in vacation period after their Vth semester examination and before academic schedule of semester VI.
