### EVENT CONTENTS:

Department of Mechanical Engineering of **DYPSOE** in association with **Edgeline Championship, Pune** has organized a seminar on **Team Building for Go-Kart**. The leading objectives of this seminar are to develop design skills, problem-solving capabilities, enhance the team-building activity, and improve management skill

This seminar is delivered by Mr. Dhiraj Gaikwad COO of Wisdomatic Swarm, Ms Affrin Sayyed CFO of Wisdomatic Swarm and Onkar Borkar CIO and CMO of Wisdomatic Swarm.

### DETAILS:-

To begin with, Mahith Mudaliyar greeted everyone at the webinar and welcomed all the guests. The portal was then handed to Mr. Dhiraj. He initiated by enlisting the different types of vehicle events that are conducted in India. He carefully elaborates the importance of the Go-Kart Event. Along with this he also instilled the importance of value addition, a student should try to gain skills related to the field, should get the certification of those skills which are relevant to the industry. He also shared his experience of Go-Kart making in his college life and how it will be helpful for industrial application.

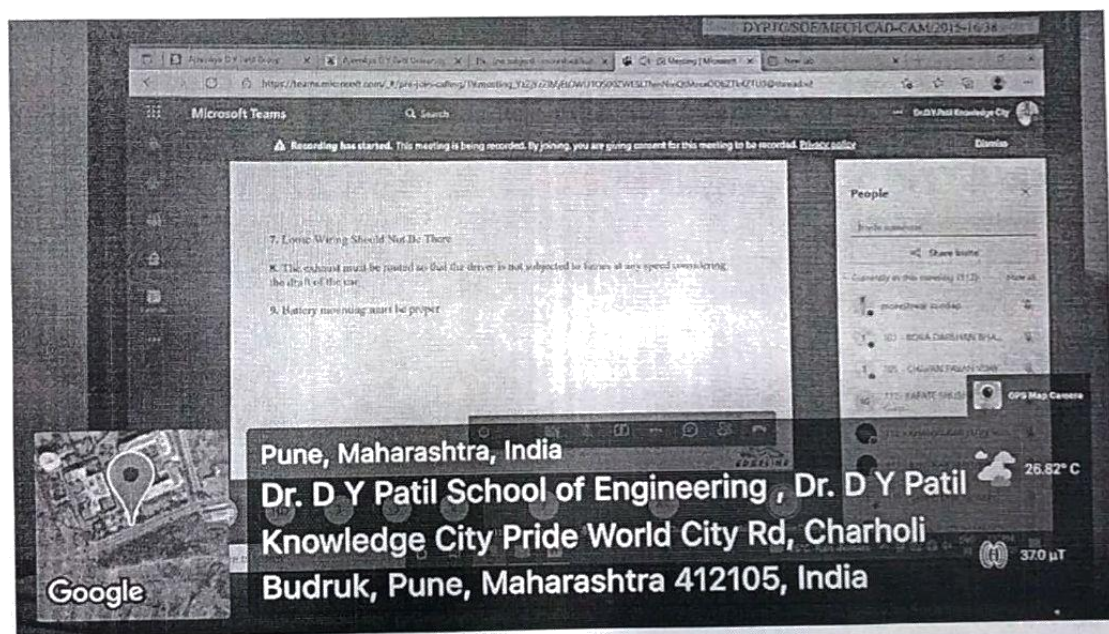

The second half of the webinar was taken by Mr. Afreen Sayyrd, She elaborates the structure of the Ideal Go- Kart team along with the Different departments. She also laid out a simple algorithm a student should follow while developing the cart, which was to start with "WH", question everything in what, why, when, etc., using this method clarifies any concept and makes it easy to develop a new idea. She debunked all the myths related to Go-Kart.

Total 116 students and 5 Faculties attended this online session. The session was coordinated by Prof. V. M Ghule (Go-Kart faculty Advisor) under the guidance of Prof. R N Garad (HoD Mechanical Engineering) and Dr.F B Sayyad (Principal DYP SOE)

### Details of the event:

The department of Mechanical Engineering had organized guest lecture on “**Study abroad after engineering**” for the benefit of pre-final year students and Third year students of D Y Patil School of Engineering. Mr. Shreyas Ramakrishnan, Regional Head - West, Jamboree Education Pvt. Ltd was the resource persons for this training program.

During the formal inaugural session, Prof. Pooja R. Nawathe, Coordinator of Training and Placement welcomed the gathering and also introduced resource persons to the students.

In first session he discussed Engineering is growing as a field of study in colleges around the world as people continue to realize how important, interesting and lucrative this field is. Engineering uses many different areas of knowledge in the construction of machines and devices. Students in engineering are well prepared to put their skills to use in a variety of interesting careers, from building cars, spaceships, and computers to designing environmentally friendly electrical systems.

Few engineering majors in the U.S. decide to study abroad, which makes sense -- an engineering course load is enough work as it is! However, there are quite a few top-rated engineering programs internationally that would be the perfect place to continue your technical studies, while also having the opportunity to study another language and explore a new country.

In second session he discussed about different exams like GMAT and GRE.

### **What is the GMAT?**

Accepted by more than 7,000 management programs in India, US and other countries, GMAT® is a computer adaptive test that assesses analytical writing, quantitative and verbal skills of students applying for MBA and similar courses to a graduate school of business. The GMAT® Exam has been the test of choice for world's leading business schools for one reason – it works. Quite simply, no other exam lets you showcase the skills that matter most in the business school classroom and in your career.

The examination is entirely computer-based and scored on a maximum of 800. Though the GMAT score alone cannot guarantee admission into a B-school, it is one of the major factors taken into consideration.

The GMAT® has four sections – Verbal, Quantitative, Integrated Reasoning and Analytical Writing Assessment. The following is the GMAT® test structure.

### **What is the GRE?**

A standardized test, the Graduate Record Examination (GRE) measures verbal, mathematical and analytical writing skills of students aspiring to undergo their graduate studies abroad. The test intends to aid graduate schools (of all fields other than business) in assessing an applicant's potential for advanced study. Most universities in the US, while inviting applications for MS programs, ask for GRE® scores.

The examination is entirely a computer-based test, and no two students get an identical set of questions. The test is scored on a maximum of 340. The GRE® score alone cannot guarantee admission into a university or college - the test is only one of the major factors taken into consideration in the long process of an applicant getting admitted into the program that they desire.

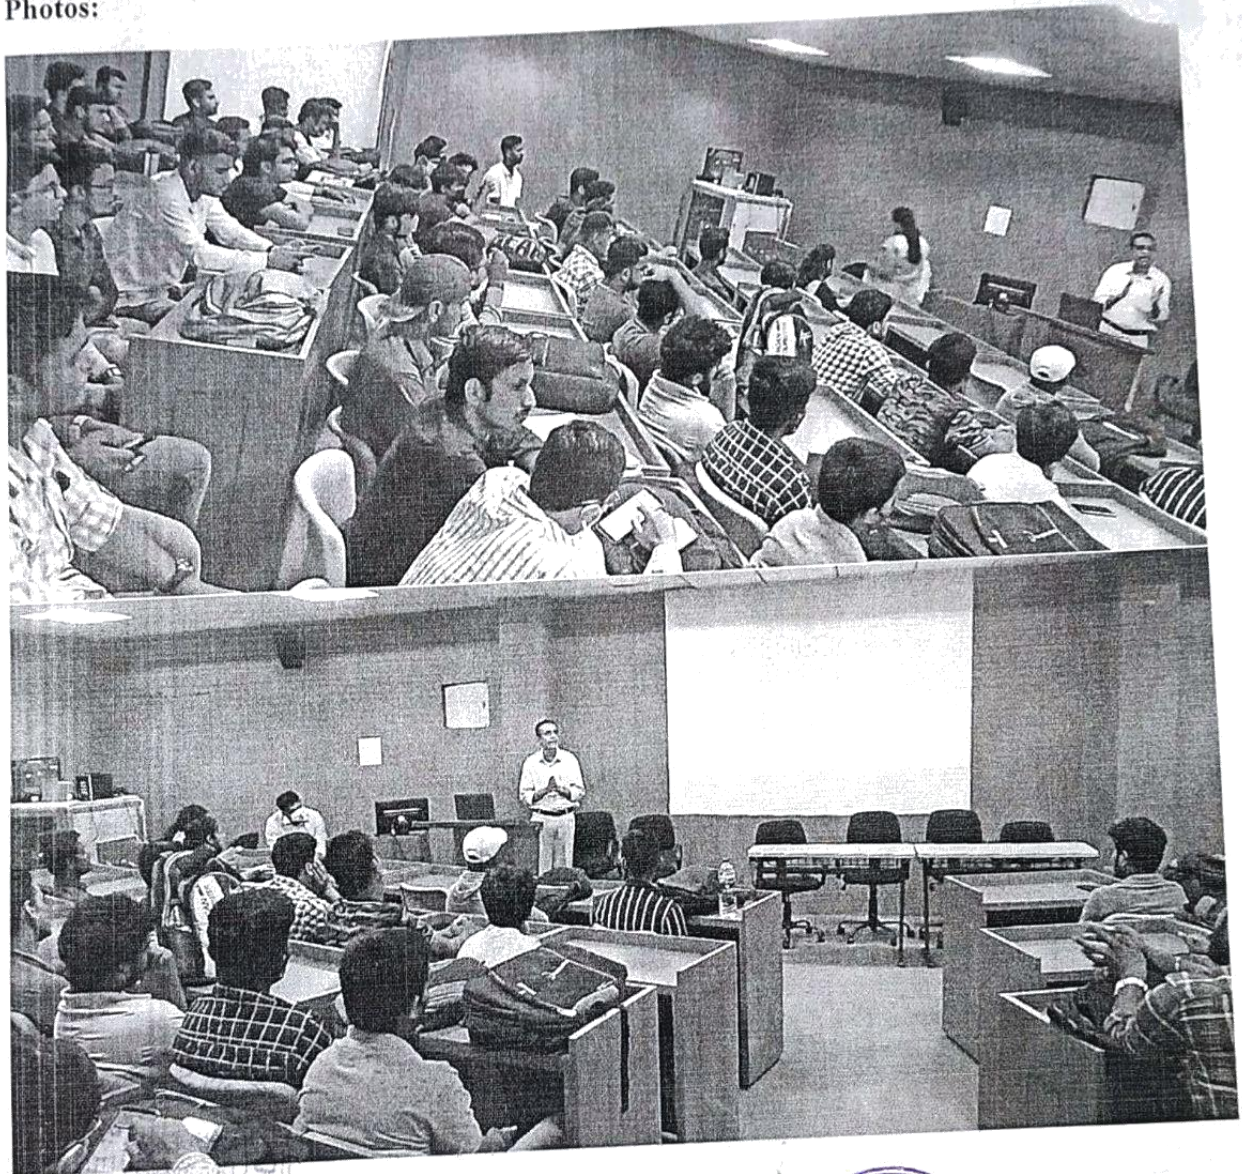

The GRE® test has three parts - Quantitative, Verbal and Analytical Writing Assessment. The following is the GRE® test structure:

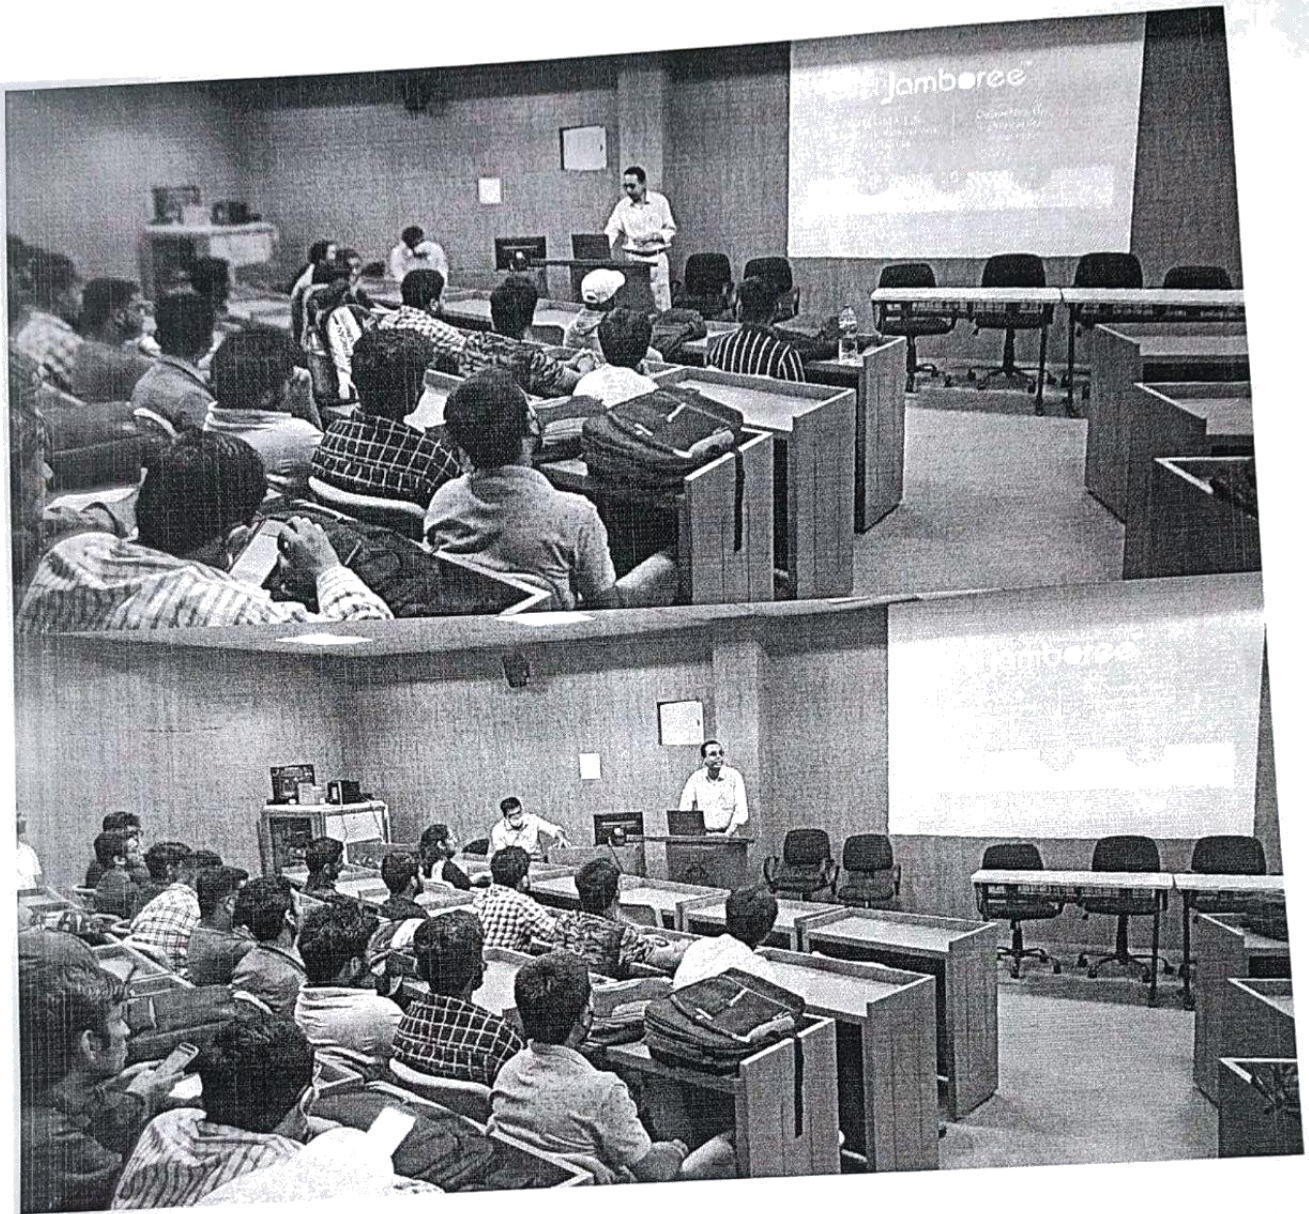

At the end of the day program concluded with Questions and feedback from students and vote of thanks by Coordinator.

#### 3.1 Details of the event:

An organizing a webinar on "5S - The Basic Tool for Continuous Improvement" for Teaching Staff at Dr D Y Patil School of Engineering, Lohegaon, Pune. The presentation has been conducted by Dr Dileep S More, Pune.

#### 3.2 Introduction to 5 S

5S was created in Japan, and the original "S" terms were in Japanese, so English translations for each of the five steps may vary. The basic ideas and the connections between them are easy to understand, though.

| Step Name       | Japanese term        | Explanation                                     |
|-----------------|----------------------|-------------------------------------------------|
| 1. Sort         | Seiri (tidiness)     | Remove unnecessary items from each area         |
| 2. Set In Order | Seiton (orderliness) | Organize and identify storage for efficient use |
| 3. Shine        | Seiso (cleanliness)  | Clean and inspect each area regularly           |

4. Standardize **Seiketsu (standardization)** Incorporate 5S into standard operating procedures
5. Sustain **Shitsuke (discipline)** Assign responsibility, track progress, and continue the cycle.

### 3.3 Benefits of 5 S

Because 5S focuses on improving a workplace, and different workplaces may have little in common, it can be hard to predict the exact results of using the program. However, some benefits are almost always found:

- **Better time usage** - Getting rid of unwanted materials and organizing the important tools and supplies will eliminate clutter and confusion. Workers spend less time finding and retrieving what they need, and can be more productive instead. Improve Communication.
- **Less wasted space** – Eliminating unnecessary material stockpiles and consolidating tool storage will clear up room for more useful applications. Every square foot of floor space has a cost, and getting the most out of that investment will maximize your facility's profitability.
- **Reduced injury rates** – Organizing work areas for efficiency and ease of use will reduce the movements needed for workers to do their jobs. Removing clutter and routinely cleaning up spills will eliminate trip hazards. As a result, workers will experience less fatigue and fewer injuries.
- **Improved consistency and quality** – Standardizing work processes will reduce variations and mistakes. By eliminating faults and failures, overall productivity can be dramatically improved.

The basic steps of 5S can be applied to any workplace. An office can use 5S to keep supplies organized, as can hospitals and medical clinics.

We, the staff of Mechanical Engineering are extremely thankful to Hon. Principal **Dr. F B Sayyad** of DYPSOE, Lohegaon, Pune. We would like to specially thank to our HoD **Prof. R N Garad**; all staff & student coordinators for providing a full-fledged support in all aspects during the entire expert lecture.

We thankful to **Dr D S More and Dr. M I Ansari**, has supported and guided us to make this lecture successful.

### Details of the event:

The department of Mechanical Engineering had organized seminar on "**Human Ethics**" for the benefit of pre-final year students of D Y Patil School of Engineering. Mr. Kaustubh Dhawale Alumni of Mechanical Dept, DYPSOE) were the resource persons for this training program.

During the formal inaugural session, Prof. Pooja R Nawathe, Coordinator of Alumni welcomed the gathering and also introduced resource persons to the students.

He explain Professional ethics are values that manage the attitude of a person or group of corporate/professional environment. It also provide guidelines on an environment on how a person should act towards other people and institutions Education is clearly about understanding (what to do?), learning skills (how to do?) and practicing the understanding & skills leading to fulfilment of one's purpose. It is not just about learning skills (how to do?). The subject which deals with "what to do" and "what not to do" is called value education – it facilitates development of Right Understanding. The subject which deals with "how to do" is called technical education or professional education – it facilitates development of skills. As there is a complementarity among them and are required, the priority need to be values, than skills. The impression on students on professional ethics are • Students respect professionalism • Students disagree dismissal of an employee who are against law • Students respect code of ethics Thus, education has an essential impact on the conduct and perception of the ethics of future professionals. Our college conducts a course to teach these skills through program. They include:

#### 1. Positive Thinking

Positive thinking can help a personality in numerous ways. It leads an individual toward confidence and helps in looking for fine things in life. It brings in an innovative perspective that can craft all the difference in the world.

#### 2. Self Esteem

Self-esteem contributes to a noteworthy position in ones motivation and triumph throughout the life. Low self-esteem may seize one back from succeeding in their respective avenues. On a contrast, having a strong self-esteem can help one accomplish because the individual moves across in his life with a positive attitude and believe in accomplishment of goals.

#### 3. Self-Worth

Self-worth is the sense that one has positive qualities and has achieved good milestones in life. It is the sense of an individual's own importance or value as a person. However, there are numerous paths for a human being to value themselves and measure their worth as a human being, and several of these are more psychologically advantageous than others.

#### **4. Self Confidence**

One may be affluent and intelligent. But if one does not poise confidence then he cannot come out and speak. Self-confidence is important than the hard work. It can be obtained through practice

#### **5. Goal Setting**

Goal setting is the procedure of identifying something that you want to achieve and institute measurable goals in time bounded frames. It involves the growth of an action plan planned to stimulate and guide an individual to boost efficiency.

#### **6. Time Management**

“Until we can manage time, we can manage nothing” – Peter Drucker “Life and time are the world’s best teachers. Life teaches us to make good use of time and time teaches us the value of life”- APJ Abdul Kalam Time management is the route of classifying and scheduling how to manage time amid specific activities. Good time management allows an individual to work smarter. There are various methods and skills involved in time management. Few of them include avoiding delay, organizing work-life balance, utilizing waiting time productively; get ready with a ‘To-do list’, prioritizing tasks, and reinstating useless activities with productive activities.

#### **7. Empathy**

Empathy is the skill to comprehend another person’s difficulties and point of vision. It is the act of understanding, being responsive of, being aware to, and vicariously experiencing the thoughts, and experience of another of either the past or present without encompassing the feelings, thoughts, and practice fully conversed in a purposive explicit manner

#### **8. Body language**

Body language is an important communication skill. It is the unspoken factor of communication that we use to disclose our true emotions and feelings that includes posture, facial expressions and gestures. Positive body language adds vigor to the verbal ideas or messages that one wants to express, it will also help an individual to avoid sending confusing or mixed signals.

#### **9. Team work**

It is very significant to have an efficient team leader who motivates the team towards the goal directed behavior. Effective Teamwork includes: • Understanding team goal and objectives • Knowing the roles and responsibilities in the team • Respecting others thoughts, opinions, perspectives • Sharing the knowledge and expertise • Appreciating others contribution • Resolving conflicts with empathy Team work makes Dream works.

#### 3.1 Details of the event:

A Workshop on "Demonstration of Additive Manufacturing Technology" for Second Year students of Department of Mechanical Engineering, Dr D Y Patil School of Engineering, Lohegaon, Pune. The presentation will be conducted by Mr. Swarnim N Gupta, GM, ENPRO Industries Pvt. Ltd., Pune.

#### 3.2 Introduction to 3D Printing

3D printing is a form of additive manufacturing technology where a three dimensional object is created by laying down successive layers of material. It is also known as rapid prototyping, is a mechanized method whereby 3D objects are quickly made on a reasonably sized machine connected to a computer containing blueprints for the object. The 3D printing concept of custom manufacturing is exciting to nearly everyone. This revolutionary method

for creating 3D models with the use of inkjet technology saves time and cost by eliminating the need to design; print and glue together separate model parts. Now, you can create a complete model in a single process using 3D printing. The basic principles include materials cartridges, flexibility of output, and translation of code into a visible pattern.

### 3.3 Benefits of 3D Printing

- The most successful companies have adopted 3D printing as a critical part of the iterative design process to:
  - Increase Innovation
    - Print prototypes in hours, obtain feedback, refine designs and repeat the cycle until designs are perfect.
  - Improve Communication
    - Hold a full colour, realistic 3D model in your hands to impart infinitely more information than a computer image.
    - Create physical 3D models quickly, easily and affordably for a wide variety of
- Applications.
- Speed Time to Market
  - Compress design cycles by 3D printing multiple prototypes on demand, right in your office.
- Reduce Development Costs
  - Cut traditional prototyping and tooling costs.
  - Identify design errors earlier.
  - Reduce travel to production facilities.

We, the Students of third year and final year Mechanical Engineering are extremely thankful to Hon. Principal **Dr. F B Sayyad** of DYPSOE, Lohegaon, Pune. We would like to specially thank to our HoD **Prof. R N Garad**; all staff & student coordinators for providing a full-fledged support in all aspects during the entire expert lecture. We thankful to **Dr D S More and Dr. M I Ansari**, has supported and guided us to make this lecture successful.

### **An Event on Savitribai Phule Smruti Din**

*Savitribai Phule Smruti din* was a martyr that fought against the caste system and other social evils that prevailed in India. This was the lady that started a school for the downtrodden and was also the first lady teacher that India has ever seen. She was married to a very justice oriented man and they led many movements for the oppressed together!

#### **History and personal life:**

Savitribai Phule was born on January 03, 1831, at Naigaon, Maharashtra. She was a child bride to the activist and social reformer Jyotirao Phule. The support from her husband led her to read, write and establish India's first school for girls, called Bhide Wada in Pune in the year 1848.

They both believed that education was the only medium for empowering the depressed class and women to stand out equally with the rest of society.

She was known as the 'Crusaders of gender justice'. She completed her teaching training at an institute called American Missionaries in Ahmednagar and Pune's Normal School.

#### **Her impact on society:**

At a time when education was limited and had very few missionary schools to be opened for all. At the ages of 21 and 17, both Jyotiba and Savitri opened schools for women in 1848. It was the first initiative by Indians to open schools for women's education.

In the year 1849, Jyotiba and Savitri left their home as their work towards women's education was considered against society by their own family members.

They both stayed in Usman Sheikh's house where she met Fatima Begum Sheikh, who was the first Muslim woman teacher of India.

On this day our NSS DYP SOE had organised an event in the college campus the guests were respected principle sir, and faculties.
